OF PHYSICS

Dear Josh,

Thanks for the note and I will remove the added H_a . With reference to your offer to help on the terminology, I would be very grateful. However there are certain difficulties and also some questions, I don't know whether to publish this in the C.S.I. symposium or in Genetics. If it's to be the former then all correction should be made by the 12th of June.

I had hoped to be able to discuss this with you at C.S.H. but Anderson said that you were in doubt about coming. I would like to urge you to come especially since I gather that Max has intentions of starting a discussion of phase genetics in terms of the Watson + Crick (Nature, April 25) model of DNA structure.

If you are not going to be at C.S.H. please write me there as to what you think about the method of publication and any specific suggestions on terminology - in contrast sincerely
